Office Action Summary

Art Unit: 2815

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 73-144 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zhang '733, '360, or '426 in view of Yamazaki '636.

The previous rejection still applies. The new limitations do not structurally distinguish over the prior art where in Yamazaki hydrogen or halogen neutralizer is disclosed and in Zhang where hydrogen is disclosed. The particular concentration claimed is inherent in the prior art or would have been routine experimentation for one of ordinary skill seeking to maximize device function.

3. Applicant's arguments filed September 5, 2000 have been fully considered but they are not persuasive. Applicant's arguments regarding the concentrations of carbon, nitrogen, and oxygen, are unconvincing in view of the teachings of Yamazaki who specifically teaches similar concentrations. Likewise, Yamazaki also teaches hydrogen or halogen dangling bond neutralizers. Applicant's arguments are unconvincing over the teachings and suggestions of the applied art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2815

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
